

## **The 2016 Class Represents Nine States with 10 Participants**

**Indiana** – Rachel Stowers is an Agribusiness Management major at Purdue University. This Kirklint, Indiana native will be working as a Sales and Marketing Intern with DuPont in their Crop Protection unit in the Midwest. Her internship will allow her to work closely with the sales teams in the region on projects related to implementing new traits into DuPont’s chemical product line and informing customers about the new traits.

**Iowa** – Tony Moellers is pursuing a double major in Agronomy and Seed Science at Iowa State University. He’ll intern with Dow AgroSciences and Mycogen Seeds in Eastern Iowa in a commercial sales position. This is his second year with DAS. Moellers is a native of West Union, Iowa.

**Kansas** – Jessica Bramhall, an Agronomy major at Kansas State University, is from Seneca, Kansas. She’ll intern with Bayer CropScience as a Sales Intern in the Wheatland District which includes Kansas, Colorado, and parts of Nebraska. Bramhall will establish, maintain and evaluate field test plots designed to determine the efficacy of pesticides on insects, weeds and plant diseases of agronomic concern.

**Michigan** – Andrea Williams of Hale is pursuing an Agribusiness Management degree from Michigan State University. She is interning at the Michigan Agri-Business Association in Lansing where she assists with data input, publicizing events and issues on various media platforms plus helps to coordinate events and conferences during the year.

**Minnesota** – Dillan C. Smith, from Storm Lake, Iowa, is pursuing a Plant Science-Production major with a minor in Agronomy at the University of Minnesota. This summer he's interning with Monsanto as a row crop sales intern which will involve rotating through the different sales businesses within the company to learn the different sales approaches.

**Missouri** – Booneville, Missouri student Carley Esser is majoring in Agricultural Education - Leadership with a minor in International Agriculture, Agricultural Economics and Psychology at the University of Missouri. Esser will intern with Missouri Farmers Care in Columbia, Missouri. She'll work to promote the agricultural industry and support Missouri's farmers and ranchers through education and advocacy.

**Missouri** – Nora Faris of Concordia is majoring in Science and Agricultural Journalism with a minor in Agricultural Economics at the University of Missouri. Faris will intern with FLM+ Public Affairs in Washington, D.C., a hybrid marketing and strategic communications firm, which specialized in advancing the interests of agribusinesses and rural communities. She'll help clients to develop strategies for public policy advocacy that reach from the cornfields of the Midwest to Capitol Hill.

**Nebraska** – Jennifer Myers is working on her degree in Plant Biology with a minor in Bioinformatics at the University of Nebraska-Lincoln. She plans to intern with Dow AgroSciences at their York, Nebraska location. . This Sidney, Nebraska native will help with the testing and breeding of crops over the course of the summer.

**North Dakota** – Taylor Kemper is pursuing a Crop & Weed Science: Agronomy major and Agribusiness minor from North Dakota State University. She'll work for Dow AgroSciences as a sales intern throughout North Dakota and Northern Minnesota. The Herman, Minnesota native will learn about sales by spending time with territory representatives and helping them as needed and may include checking fields for injury or issues, helping with plots, and visiting with farmers or retailers.

**South Dakota** – Kyla Mauk is an Agriculture Education major at South Dakota State University. Originally from Howard Lake, Minnesota, Mauk will intern with DuPont Pioneer as a Sales and Marketing Intern covering the territory from Alexandria, Minnesota to River Falls, Wisconsin and northern part of Minnesota. She'll work on surveying customers, developing promotional materials as well as customer field days.
